

BEAM READY

Save Time Saving Lives

MC SMART CONTROLS

Install a BR-1000 In the window of any child, elderly, or disabled person:

The BR-1000 is triggered by any smoke detector alarm audio within 30 feet. The device will illuminate a multicolored high intensity flashing LED in the window of the individual.

The BR-1000 will also shoot a high intensity laser beam out the window that will cut through any smoke and give the fireman and first responders a direct path to the person's room.

Install a BR-1000 s in the hallways of any building:

The BR-1000 will shoot a high intensity laser beam that illuminates through the air and smoke to a safe passageway to the nearest exit point in any building.

A Smart Fire Rescue Device

📺 The Beam Ready BR-1000 is designed with a high intensity flashing multicolor LED that illuminates in the window of the child or a person who needs the attention and help the most.

🔴 The Beam Ready BR-1000 is designed with a high intensity laser beam that illuminates through the air and smoke a safe passage to the nearest exit point in any building.

🏠 The Beam Ready BR-1000 is a smart home device with onboard WIFI. The BR-1000 will connect to most other smart home devices and smart home alarm systems. The Beam Ready BR-1000 also comes with a free APP for constant personal monitoring.

Back in the day, families installed large red fire alert sticker signs in the windows of children, elders, and invalids in their home. This made it easy for firefighters and rescue people to target their rescue efforts to the most vulnerable people. Unfortunately, this also put up a target for undesirables to exploit the weak. This became a problem and people stopped using the signs. Hence, the Beam Ready BR-1000H.
